[™] harikrishnanallamaru@gmail.com

D.No.3/38, Ramanapalli, Kadapa, Andrapradesh, India (516162)

Objective:

Aspiring Software Engineer with a strong foundation in computer science and hands-on experience in software development through academic projects and internships. Eager to apply my programming skills and problem-solving abilities to contribute to innovative software solutions. Motivated to learn and grow within a dynamic tech environment.

Technical Skills:

Programming Languages: Java, Python, C

Web Technologies: HTML, CSS, JavaScript, ReactJS

Databases: MySOL

Tools & IDEs: Visual Studio Code, Eclipse

Operating Systems: Windows

Education:

B.Tech in Computer Science and Engineering – May 2023 Sri Venkateswara college of engineering, Kadapa, Andhra Pradesh

Projects:

Project Title: Bigmart Sales Dataset Analysis Using machine learning.

Description: In this project to build predictive models of each product at a particular store. Big Mart will use this model to understand the properties of products and stores, which play a key role in increasing sales.

Project Title: Master Face Attack On Face Recognition System.

Description: To develop a face recognition system using a deep learning approach called convolutional neural network (CNN). The goal of the system is to accurately identify faces of individuals from images. And the additional features such as encryption of text and a graphical user interface (GUI) implemented using the Streamlit library. These features enhance the usability and security of the system.

Certifications:

Certification of HackerRank - Java, HTML, SQL

Additional Skills:

- Troubleshooting
- Network Operations
- Interpersonal communication
- Problem solving
- Teamwork
- Critical thinking
